

Enbridge Community Meeting

Keeping in touch with our neighbors is important to us.

Join us for a virtual Community Meeting where we'll share information about our pipelines, the products we transport, and the work we do to keep communities and the environment safe.

Enbridge representatives from across the region will provide a formal presentation related to pipeline safety and local operations. Following the presentation, a Q&A session will be offered and Enbridge subject matter experts will be available to answer questions. We invite you to join one of the virtual Community Meetings in your area either online via the webcast link or by telephone.

Wednesday, March 10
